Educational Experience

- Project title: Cross sectional area measurement of irregular shapes
- Team size: 3
- My role: Designing the apparatus
- Project Description:

It is difficult to measure area of cross section of viscoelastic bodies like ligaments, tendons or tissues. So we designed an apparatus by using laser distance sensor which can give us cross sectional area of such bodies at any point along its length so that we can find out the point under maximum stress on these viscoelastic bodies.
