House of Tamperproof Seals

*Presents*

**SAFE TIE™**  
New Strap-seal with  
Metal Locking Insert

000005

SAFE TIE

## APPLICATIONS:

- Polythene Bags
- Chemical Bags
- Cash Bags
- Courier Bags
- Cargo Bags
- Jumbo Bags
- Containers
- Drums (FIBER, HDPE, M.S.)
- Other closure

## ADVANTAGES OVER OTHER STRAP SEALS

### ◆ RELIABLE & TAMPER PROOF

'SAFE TIE' is 'Fusion' of PLASTIC & METAL as it contains 'METAL LOCKING INSERT', Unlike Plastic To Plastic Locking System In Other Strap Seals.

### ◆ 'SAFETIE' IS IRREVERSIBLE as

It Contains a 'METAL LOCKING INSERT' Having 8-10 Sharp Teeth, Which Catch the Strap Once Inserted Properly & Does Not Allow Reverse Back So 'bag' or 'closure' Can Not Be Opened Without Cutting The SAFETIE.

### ◆ CLEAR & BOLD IDENTIFICATION

Bigger Flap For Clearer & Bolder Printing of Clients Name, Logo & Srl. No. Special Loop In Flap Allows To Put Any Identification Label or Excess. Strap Can Be Tucked In The Loop.

### ◆ NO SEALING TOOL REQUIRED

### ◆ RECYCLABLE

### ◆ STRONGER THAN OTHER STRAP SEALS

Being Thicker & Wider In Size 'SAFETIE' Is Much Much Stronger Than Other Strap Seals. All Other Strap Seals Are Mediocre When Compared To 'SAFETIE'

### ◆ ONEWAY ENTRY

SAFETIE leaves no room for wrong sealing as it can not be sealed wrongly as 'METAL LOCKING INSERT' allows ONE WAY ENTRY.

## LOCKING INSTRUCTIONS

- Encircle the twisted neck of bag with the SAFETIE, strap seal or pass the narrow end of SAFETIE, strap seal through the aperture of the closure, (i.e. Drums/Tanker/Trolleys & other closure) to be sealed.
- Insert the narrow tail of SAFETIE into the Locking Receptacle from INSERT HERE Side.
- Push the narrow tail of SAFETIE further till you get enough holding length to pull.
- Pull firmly the tail of SAFETIE till it gives the Tight grip to the bag or closure.
- Excess length of SAFETIE can be tucked into the secondary loop catch or any identification label can be put into the same
- Special sealing method can be suggested on request.
